THE ACA

Employers in business, practice and the public sector around the world attract and retain talented individuals by offering the ACA, our world-leading chartered accountancy qualification.

The ACA is a rigorous and globally-recognised qualification. Designed for today's commercial landscape, it provides your employees with the professional skills and strategic insight they need to make a real impact on your organisation.

It has four components that combine study and exams with 'on-the-job' experience. Each component has been designed to complement the others. Students can complete their training while working in a variety of areas including accounting, taxation, financial management, insolvency, information technology, audit and assurance.

OUR EXAMS

The ACA qualification is made up of 15 exams over three levels. They are designed to fit with your students’ practical experience, so they constantly progress through the qualification and gain an in-depth knowledge of accountancy, finance and business.

Our exams can be taken in any order* to suit the needs of your organisation and develop commercially effective trainees with knowledge across management and financial accounting, assurance and tax.

As a carbon-neutral organisation, we are proud to say our exams are computer-based and learning materials are paperless.

*The Case Study exam must be attempted last.
